H7D7A

RRID:CVCL_1T06

Type: Cell Line

Proper Citation

RRID:CVCL_1T06

Cell Line Information

URL: https://web.expasy.org/cellosaurus/CVCL_1T06

Proper Citation: RRID:CVCL_1T06

Description: Cell line H7D7A is a Cancer cell line with a species of origin Homo sapiens (Human)

Sex: Male

Disease: Hepatoblastoma

Defining Citation: [PMID:12619888](#), [PMID:20143388](#)

Comments: Population: Caucasian., Problematic cell line: Contaminated. Shown to be a Hep-G2 derivative (PubMed=12619888; PubMed=20143388). Originally thought to originate from SV40-transformed normal liver cells..

Category: Cancer cell line

Organism: Homo sapiens (Human)

Name: H7D7A

Synonyms: H7D7-A

Cross References: BioSample:SAMN03151769, cancercellines:CVCL_1T06, Wikidata:Q54872220

ID: CVCL_1T06

Hierarchy: cvcl_0027

Record Creation Time: 20220427T220225+0000

Record Last Update: 20260905T180034+0000

Ratings and Alerts

No rating or validation information has been found for H7D7A.

Warning: Problematic cell line: Contaminated. Shown to be a Hep-G2 derivative (PubMed=12619888; PubMed=20143388). Originally thought to originate from SV40-transformed normal liver cells.

Registration: International Cell Line Authentication Committee, Register of Misidentified Cell Lines; ICLAC-00203.

Population: Caucasian., Problematic cell line: Contaminated. Shown to be a Hep-G2 derivative (PubMed=12619888; PubMed=20143388). Originally thought to originate from SV40-transformed normal liver cells..
