Description: Cell line NRK-4xlambdaN22-3xmEGFP-M9 is a Spontaneously immortalized cell line with a species of origin Rattus norvegicus (Rat)

Defining Citation: [PMID:17603490](#)

Comments: Characteristics: Transfected with a construct containing four copies to the 22-amino-acid peptide ligand from phage lambda N protein (lambda-N22), spaced by a 21 amino acid linker (PPLDGAGAGAGAGAGGLAT) and fused to 3 monomeric meGFP and a M9 nuclear localization signal. This construct allows binding to a 15-nt RNA hairpin termed boxB that can be fused to any RNA molecule allowing specific RNA visualization in live cells (PubMed=17603490).
