**Description:** Cell line PathHunter HEK 293 CNR2 beta-arrestin is a Transformed cell line with a species of origin Homo sapiens (Human)

**Sex:** Female

**Comments:** Characteristics: PathHunter beta-arrestin cell lines co-express a GPCR tagged with a beta-galactosidase fragment (ProLink=PK) and a beta-arrestin tagged with another fragment (Enzyme Acceptor=EA). Activation of the GPCR-PK induces beta-arrestin-EA recruitment and complementation of the PK and EA enzyme fragments thus resulting into a catalytically active enzyme that generate a chemiluminescent signal.
