Proper Citation: RRID:CVCL_LB15

Description: Cell line PathHunter U2OS PROKR1 Total GPCR Internalization is a Cancer cell line with a species of origin Homo sapiens (Human)

Sex: Female

Disease: Osteosarcoma

Comments: Characteristics: PathHunter total GPCR internalization cell lines co-express a tagged with a beta-galactosidase fragment (ProLink=PK) and a second beta-galactosidase fragment (Enzyme Acceptor=EA) localized to the endosomes. Activation of the GPCR-PK induces internalization of the receptor in EA-tagged endosomes and complementation of the PK and EA enzyme fragments thus resulting into a catalytically active enzyme that generate a chemiluminescent signal., Population: Caucasian.

Category: Cancer cell line

Organism: Homo sapiens (Human)

Name: PathHunter U2OS PROKR1 Total GPCR Internalization

Synonyms: PathHunter PROKR1 Total GPCR Internalization U2OS

Cross References: DiscoverX:93-0764C3, Wikidata:Q54938272

ID: CVCL_LB15

Hierarchy: cvcl_0042

Record Creation Time: 20220427T221412+0000

Record Last Update: 20260905T182026+0000

Ratings and Alerts

No rating or validation information has been found for PathHunter U2OS PROKR1 Total GPCR Internalization.
