Cell Line Information

URL: https://web.expasy.org/cellosaurus/CVCL_1707

Proper Citation: RRID:CVCL_1707

Description: Cell line SNG-M is a Cancer cell line with a species of origin Homo sapiens (Human)

Sex: Female

Disease: Endometrial adenocarcinoma

Defining Citation: PMID:858140, PMID:2429643, PMID:2448191, PMID:9436037, PMID:10457904, PMID:12893190, PMID:20164919, PMID:20215515, PMID:22460905, PMID:25877200, PMID:26589293, PMID:27397505, PMID:28196595, PMID:30894373, PMID:30971826, PMID:31068700, PMID:31978347, PMID:35839778

Comments: Population: Japanese., Part of: MD Anderson Cell Lines Project., Part of: COSMIC cell lines project., Part of: Cancer Dependency Map project (DepMap) (includes Cancer Cell Line Encyclopedia - CCLE)., Problematic cell line: Possibly contaminated. HHUA (distributed by RCB) and SNG-M (distributed by JCRB) share similar STR profiles and have been established by the same research group. While HHUA was described in 1984 and SNG-M in 1977 it has not been possible to establish which of the two cell lines are derived from each other. Thus it has been decided to consider them as being sister cell lines originating from the same donor..

Category: Cancer cell line

Organism: Homo sapiens (Human)

Name: SNG-M

Synonyms: SNGM
