Description: Cell line S2R+-Fib-GFP-11 is a Spontaneously immortalized cell line with a species of origin *Drosophila melanogaster* (Fruit fly)

Sex: Male

Comments: Characteristics: Transfected with a pMT-FLAG-Cas9 construct where the expression of N-terminally FLAG-tagged Cas9 is driven by a copper-inducible metallothionein promoter (from parent cell line S2R+-MT::Cas9)., Characteristics: The constitutively Cas9-expressed parent cell line was modified with a knock-in of eGFP into the Fib locus (FlyBase_Gene=FBgn0003062)., From: *Drosophila* RNAi Screening Center (DRSC), Harvard Medical School; Boston; USA., Group: Insect cell line.

Category: Spontaneously immortalized cell line

Organism: *Drosophila melanogaster* (Fruit fly)
