**Target Antigen:** ERBB3 / HER3 antibody

**Host Organism:** goat

**Clonality:** polyclonal

**Comments:** Discontinued; manufacturer recommendations: ELISA; Western Blot; ELISA, Western Blot. Approx 150kDa band observed in human lysates of T cell line JURKAT (calculated MW of 148kDa according to NP\_001973.2). Recommended concentration: 0.1-0.3µg/ml. A minor band of unknown identity was also consistently observed at 48kDa. This band was successfully blocked by incubation with the immunising peptide. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates? Have any further splice variants/modified forms been reported? This antibody is expected to recognise isoform 1 (NP\_001973.2) only.
