Target Antigen: Myc

Host Organism: goat

Clonality: recombinant

Comments: Anti-c-Myc chimeric recombinant antibody. The hybridoma-derived heavy chain variable sequence and kappa light chain are fused to a goat IgG3 Fc. This antibody has been engineered from sequences from a mouse monoclonal parent antibody. By necessity, some mouse sequences are retained. When multiplexing with mouse antibodies, we recommend using Fc-directed, preadsorbed secondary antibodies.
