Target Antigen: Calcineurin A antibody

Host Organism: rabbit

Clonality: polyclonal

Comments: Discontinued; manufacturer recommendations: IgG; IgG Western Blot; Western Blotting (1-4 µg/ml) and for immunoprecipitation (10-20 µg/ml). However, the optimal conditions should be determined individually. The immunoaffinity purified antibody detects a 61 kDa band, corresponding to the expected molecular weight of Calcineurin A on immunoblots. A 32 kDa band can also be detected in human samples, presumably to be the cleavage product of Calcineurin A..
