Proper Citation: RRID:Addgene_11662

Insert Name: FF3

Organism: Firefly

Bacterial Resistance: Chloramphenicol

Defining Citation: [PMID:16141338](#)

Vector Backbone Description: Backbone Size:8226; Vector Backbone:pPRIME-TET-GFP; Vector Types:Mammalian Expression, Lentiviral; Bacterial Resistance:Chloramphenicol

Comments: TET promoter (minimal CMV promoter containing seven upstream Tet-operator sites) transcribes GFP and miR30-based shRNA targeting FF3. The FF3 hairpin can be replaced with any other hairpin by cloning into the EcoR1/Xho1 site. Please note that the full plasmid sequence shown here is for the empty vector only and does not contain the FF3 targeting sequence
