Comments: To generate the unique SpeI site, a short, 37 bp, linker was inserted into an existing NdeI site. This linker seems to have been inserted 2 or more times, creating a short repeat region that we have been unable to sequence across. Sequencing with the M13 reverse primer will fail. Please note: eft-3 has officially been changed to eef-1A.1 Please see the eef-1A.1 WormBase entry for details:
