Comments: The 5' restriction site used for cloning is NotI (EcoRI, BglII are 5' to that site) and there is an internal XhoI site at bp 84 of the 654 bp RpL10Ab fragment. There is a unique KpnI site immediately following the XhoI site at the 3' end of the cloned fragment. The NotI site and BglII sites are also usable for anyone wanting to reclone the fragment and the XhoI site is not usable but the KpnI site is.
