pLVET-tTR-KRAB

RRID:Addgene_11644

Type: Plasmid

Proper Citation

RRID:Addgene_11644

Plasmid Information

URL: <http://www.addgene.org/11644>

Proper Citation: RRID:Addgene_11644

Insert Name: hEF-1alpha, GFP, tTR-KRAB, Tet-on

Bacterial Resistance: Ampicillin

Defining Citation: [PMID:16432520](#)

Vector Backbone Description: Backbone Size:12386; Vector Backbone:None; Vector Types:Mammalian Expression, Lentiviral; Bacterial Resistance:Ampicillin

Comments: Transgenes can be expressed from any RNA Pol II promoter as part of bicistronic unit comprising the KRAB-based repressor; tetO sequences are inserted into the vector LTR. Tet-on and Tet-off versions rely on repressors that bind in the absence or the presence of doxycycline, respectively. Addition of Pol III promoter-small hairpin RNA cassette allows for drug-controllable RNA interference (Tet-on shRNA). Cloning shRNA into pLVET, pLVCT, and pLVPT vectors: first clone shRNA into pLVTHM downstream of the tetO-H1 region. Then cut pLVTHM containing your shRNA with MscI-FspI and clone the insert containing the 3'LTR to target plasmid opened with MscI-FspI. FspI cuts into AmpR. This means for inverted clones AmpR will not be restored; after selection you will be left with clones with the shRNA cassette and functional AmpR. pLVTHM and packaging plasmid for this system are also available at Addgene <http://www.addgene.org/rnaitools> Please note that the full sequence for this plasmid is approximated and not fully verified. Please visit Trono lab website <http://tronolab.epfl.ch> to see frequently asked questions on cloning strategies and packaging.

Plasmid Name: pLVET-tTR-KRAB

Record Creation Time: 20220422T221610+0000

Record Last Update: 20260919T090613+0000

Ratings and Alerts

No rating or validation information has been found for pLVET-tTR-KRAB.

No alerts have been found for pLVET-tTR-KRAB.
