Bacterial Resistance: Chloramphenicol and Ampicillin

Defining Citation: [PMID:29056345](#)

Vector Backbone Description: Backbone Marker:Gregory Newby; Backbone Size:11381; Vector Backbone:pGAN147; Vector Types:Yeast Expression; Bacterial Resistance:Chloramphenicol and Ampicillin

Comments: This is the empty reverse yTRAP sensor plasmid. To sense aggregation of your favorite protein, clone the coding sequence into a pENTR clone, then perform LR reaction with pGAN230. The resulting expression clone should be linearized with NotI-HF enzyme prior to integration into the yeast genome. The sensor integrates into the HO locus, and can be selected for using nourseothricin. To achieve dual color reporting, combine with pSK221.
