Comments: This plasmid was designed to tag transcripts of insert at the 3' with an 12X MS2 stem loop tag. Insertion of the transcript of interest is performed by Bsal cloning. 5' Bsal generates ACAG overhang (Bsal recognition site 2659-2664) 3' Bsal generates CCCG overhang (Bsal recognition site 4086-4091) These Bsal sites are lost upon insertion of the transcript of interest.
