Comments: TEV tag ENPYFQG instead of ENLYFQG. The cDNA used in making dKDM4B(CG33182) constructs has incomplete 3' end. It is because NCBI data has updated the sequence after I made the construct. There is a comment on NCBI page <https://www.ncbi.nlm.nih.gov/entrez/viewer.fcgi?val=161077032&from=148&to=1920&view=gbwithp> indicates that they replaced a former sequence of CG33182 <https://www.ncbi.nlm.nih.gov/entrez/viewer.fcgi?val=28573833> with the current 1773bp one.
