pBAD empty polycistronic destination vector (8D)

RRID:Addgene_48282

Type: Plasmid

Proper Citation

RRID:Addgene_48282

Plasmid Information

URL: <http://www.addgene.org/48282>

Proper Citation: RRID:Addgene_48282

Bacterial Resistance: Ampicillin

Vector Backbone Description: Backbone Size:5767; Vector Backbone:pBAD; Vector Types:Bacterial Expression; Bacterial Resistance:Ampicillin

Comments: This plasmid is an empty destination vector. It is a polycistronic vector that can express up to five genes at once. Genes must first be cloned into any of our 8-series transfer vectors (8BT,8CT,8UT), then subcloned into any of the five cassettes of the destination vector: Cassette 1: BamHI/XbaI Cassette 2: AsiSI/PspXI Cassette 3: SbfI/AscI Cassette 4: AclI/NotI Cassette 5: PacI/FseI Please note that you must always insert your gene into the lowest cassette number first (e.g., if you're using cassettes 2 and 3, you must put your gene into cassette 2 first, then move on to cassette 3). You do not have to use all of the cassettes. More information on this vector can be found through <http://qb3.berkeley.edu/qb3/macrolab/>

Plasmid Name: pBAD empty polycistronic destination vector (8D)

Record Creation Time: 20220422T222248+0000

Record Last Update: 20260829T080614+0000

Ratings and Alerts

No rating or validation information has been found for pBAD empty polycistronic destination vector (8D).

No alerts have been found for pBAD empty polycistronic destination vector (8D).
