**Description:** A contract research organization (CRO) specializing in preclinical oncology services. As a pioneer in the field of patient derived tumor xenografts (PDX), they provide tailored solutions to the problems faced by preclinical oncology researchers. They assist with the identification of the best drug candidates and the validation of their targets and deliver indepth bioinformatics analyses, laying the groundwork for the successful planning of clinical trials. Their diverse tumor model collection enables them to recommend the right assays and models to answer their customers' questions. Their AAALAC accredited facilities with IVC system, separate model development unit, large cage capacity of over 14,500 mice and proprietary electronic measurement system with an integrated database and by continuously maintaining important PDX models in mice, they are able to provide the highest standard of testing within a reasonable timeframe.

Abbreviations: Oncotest

Synonyms: Oncotest GmbH

Resource Type: commercial organization

Keywords: preclinical, oncology, xenograft

Related Condition: Cancer, Tumor

**Funding:** 

Resource Name: Oncotest

Resource ID: SCR\_000489

Alternate IDs: nlx\_158264

**Record Creation Time:** 20220129T080201+0000

Record Last Update: 20250420T013951+0000

#### **Ratings and Alerts**

No rating or validation information has been found for Oncotest.

No alerts have been found for Oncotest.
