Proper Citation: GenGIS (RRID:SCR_001465)

Description: A bioinformatics application that allows users to combine digital map data with information about biological sequences collected from the environment. It provides a 3D graphical interface in which the user can navigate and explore the data, as well as a Python interface that allows easy scripting of statistical analyses using the Rpy libraries.

Resource Type: software resource

Defining Citation: PMID:23922841

Keywords: standalone software
