Proper Citation: Type 1 Diabetes Genetics Consortium (RRID:SCR_001557)

Description: Data and biological samples were collected by this consortium organizing international efforts to identify genes that determine an individual risk of type 1 diabetes. It originally focused on recruiting families with at least two siblings (brothers and/or sisters) who have type 1 diabetes (affected sibling pair or ASP families). The T1DGC completed enrollment for these families in August 2009. They completed enrollment of trios (father, mother, and a child with type 1 diabetes), as well as cases (people with type 1 diabetes) and controls (people with no history of type 1 diabetes) from populations with a low prevalence of this disease in January 2010. T1DGC Data and Samples: Phenotypic and genotypic data as well as biological samples (DNA, serum and plasma) for T1DGC participants have been deposited in the NIDDKCentral Repositories for future research.

Abbreviations: T1DGC

Synonyms: Type 1 Diabetes Genetics Consortium (T1DGC)

Resource Type: data or information resource, topical portal, research forum portal, disease-related portal, resource, portal

Defining Citation: PMID:17130525

Keywords: gene, genetics, genotyping, analytic, dna, serum, plasma, data set, biomaterial supply resource, phenotypic, genotypic, autoantibody, hla, phenotype, genotype

Related Condition: Type 1 diabetes, Diabetes

Funding: NIDDK;

NIAID ; NHGRI ; JDRF

Availability: Approval required, Consortium member, Public

Resource Name: Type 1 Diabetes Genetics Consortium

Resource ID: SCR_001557

Alternate IDs: nlx_152867

Record Creation Time: 20220129T080208+0000

Record Last Update: 20250521T060800+0000

Ratings and Alerts

No rating or validation information has been found for Type 1 Diabetes Genetics Consortium

No alerts have been found for Type 1 Diabetes Genetics Consortium .
