Proper Citation: Functional Regression Analysis of DTI Tract Statistics (RRID:SCR_002293)

Description: Software for the analysis of multiple diffusion properties along fiber bundle as functions in an infinite dimensional space and their association with a set of covariates of interest, such as age, diagnostic status and gender, in real applications. The resulting analysis pipeline can be used for understanding normal brain development, the neural bases of neuropsychiatric disorders, and the joint effects of environmental and genetic factors on white matter fiber bundles.

Abbreviations: FRATS

Synonyms: Functional Regression Analysis of DTI

Resource Type: data processing software, software application, image analysis software, software resource

Defining Citation: [PMID:20335089](#)

Keywords: computational neuroscience, imaging genomics, magnetic resonance, regression analysis, dti, statistics
