Nu-OSCAR

RRID:SCR_004513

Type: Tool

Proper Citation

Nu-OSCAR (RRID:SCR_004513)

Resource Information

URL: http://bioinfo.au.tsinghua.edu.cn/nu_oscar/oscar.html

Proper Citation: Nu-OSCAR (RRID:SCR_004513)

Description: Software tool to identify binding sites of known transcription factors on promoter regions. The algorithm is based on one-class support vector machine (One-class SVM). OSCAR uses the sequential composition of known binding sites, and further incorporates the locational preferences of binding events. Nu-OSCAR (Nucleosome-Occupancy Study for Cis-elements Accurate Recognition) is a program that can be used to identify binding sites of known transcription factors, which further incorporates nucleosome occupancy around sites on promoter regions, thereby improving the accuracy of prediction. The derivation of the the algorithm is based on a biophysical view of interactions between protein factors and nucleosome DNA.

Abbreviations: OSCAR

Synonyms: One-class SVM for Cis-elements Accurate Recognition, Nucleosome-Occupancy Study for Cis-elements Accurate Recognition

Resource Type: analysis service resource, data analysis service, production service resource, service resource

Resource Name: Nu-OSCAR

Resource ID: SCR_004513

Alternate IDs: OMICS_00507, nlx_49691, SCR_010892

Record Creation Time: 20220129T080225+0000

Record Last Update: 20260821T193722+0000

Ratings and Alerts

No rating or validation information has been found for Nu-OSCAR.

No alerts have been found for Nu-OSCAR.
