### Resource Information

**URL:** <http://journal.code4lib.org/>

**Proper Citation:** Code4Lib Journal (RRID:SCR\_004687)

**Description:** This article is an appeal to technically-oriented library staff to initiate collaborative, bottom-up data-analysis efforts across their libraries. We discuss successful strategies used at North Carolina State University (NCSU) Libraries for initiating cross-departmental outreach for data-analysis work, as well as structuring and storing data, and disseminating findings. We present several specific examples of collaborative data-analysis projects undertaken at NCSU Libraries. Although the primary goal of the Code4Lib Journal is to provide practical solutions for technologists working in libraries, it has a lot to offer non-technologists. Technology affects all of the work that our libraries are doing and will define what the future of libraries will look like.

**Abbreviations:** Code4Lib Journal

**Resource Type:** narrative resource, data or information resource
