Proper Citation: ScienceOnline2012 (RRID:SCR_004932)

Description: ScienceOnline2012 is the sixth annual international meeting on science and the Web. The agenda includes more than 70 discussion sessions and workshops over three full days, and additional demonstrations, science lab tours, a museum reception & a dose of comedy. ScienceOnline2012 #scio12 across social media will take place January 19-21, 2012 on the campus of NC State University in the spacious McKimmon Center, with some 450 participants. Every January since 2007, the Research Triangle area of North Carolina has hosted scientists, students, educators, physicians, journalists, librarians, bloggers, programmers and others interested in the way the World Wide Web is changing the way science is communicated, taught and done. As in all the previous years, the meeting will be held in an "unconference" style the program is built beforehand with the help of participants on the planning wiki, and the sessions are designed to foster conversations and discussions among everyone in the room rather than a traditional one-before-many lecture approach. Help us continue the success of past conferences by familiarizing yourself with the plans for ScienceOnline2012, volunteering to help, offering your organization's or company's sponsorship or in-kind support, and, above all, engaging with the online science community before, during and after the conference.
