Proper Citation: TreeBASE (RRID:SCR_005688)

Description: Repository of phylogenetic information, specifically user-submitted phylogenetic trees and the data used to generate them. TreeBASE accepts all kinds of phylogenetic data (e.g., trees of species, trees of populations, trees of genes) representing all biotic taxa. Data in TreeBASE are exposed to the public if they are used in a publication that is in press or published in a peer-reviewed scientific journal, book, conference proceedings, or thesis. Data used in publications that are in preparation or in review can be submitted to TreeBASE but will not be available to the public until they have passed peer review.

Abbreviations: TreeBASE

Synonyms: TreeBASE - A Database of Phylogenetic Knowledge

Resource Type: service resource, data or information resource, storage service resource, database, data repository

Keywords: taxonomy, matrix, tree, topology, phylogeography, cladistic analysis, amino acid sequence, animal behavior, morphology, nucleotide sequence, genetics, dna, phylogeny, evolution, gene, population, web service, FASEB list

Funding: NSF DEB 9318325;
NSF EF 0331654

Availability: Public, The community can contribute to this resource
