Proper Citation: University of Florida DNA and Tissue Bank (RRID:SCR_006581)

Description: The Alpha-1 Foundation DNA and Tissue Bank, established in 2000 by the Alpha-1 Foundation, is a repository specifically for medical information (hyperlink to data points) and tissue samples (DNA, plasma, lung/liver) for alpha-1-antitrypsin deficient individuals, their family and friends. The Bank serves the international scientific community. Currently the Bank has the largest collection of DNA in the world for Alpha-1-antitrypsin research studies. The Alpha-1 Foundation has established a Tissue Bank Advisory Committee which includes a wide representation of physicians, ethicists, attorneys, consumers as well as international experts in tissue banking. Collectively this Advisory Committee reviews requests for research. At this time the Bank has over 2400 members who have provided valuable medical and/or tissue samples. For investigators interested in obtaining tissue samples with phenotypes from the Bank, please contact the Alpha-1 Foundation or our research staff at the University of Florida.

Abbreviations: Alpha-1 DNA and Tissue Bank

Synonyms: Alpha-1 Foundation DNA Tissue Bank, UF DNA Tissue Bank, Alpha-1 DNA Tissue Bank, UF DNA and Tissue Bank, Alpha-1 Foundation DNA and Tissue Bank, UF Alpha-1 Foundation DNA and Tissue Bank, UF Alpha-1 Foundation DNA Tissue Bank, University of Florida DNA Tissue Bank

Resource Type: material resource, tissue bank, biomaterial supply resource

Resource Name: University of Florida DNA and Tissue Bank

Resource ID: SCR_006581

Alternate IDs: nlx_86173

Old URLs: http://www.alphaone.ufl.edu/dna_tissue_bank.php
