Proper Citation: Research Digest (RRID:SCR_006621)

Description: The British Psychological Society's award-winning Research Digest blog provides original, authoritative reports on the latest psychology research papers. Plus we publish a few other fun features too. The Digest doesn't just pick up on the same studies covered by the mainstream media. The editor trawls hundreds of peer-reviewed journals looking for the latest findings from across the breadth of psychological science. The aim is to write accessible, accurate reports on those studies that make an important contribution, that are relevant to real life, timely, novel or thought-provoking. We want to demonstrate how interesting and useful psychological science can be, whilst also casting a critical eye over the methods used. We also hope you'll use the comments function to have your say on the new research reported here. There are also "Extras" posts with links to eye-catching studies that didn't make the final cut, and the "Special Issue Spotter" with links to the latest journal special issues in psychology. Over the years there have also been a number of special guest features - look out for more in the future. In 2010 the Digest was voted best psychology blog in the inaugural Research Blogging awards.
