Proper Citation: Allograft Resources (RRID:SCR_006955)

Description: Provide quality human tissue grafts for transplantation, research or education through the compassionate support of families, outreach and education to communities. The Allograft Resources Tissue Bank was developed to fill a particular need within a single hospital in the San Antonio area. The tissue industry, as a whole, had persistently struggled with fulfilling the need for cryopreserved heart valves for the pediatric Cardiothoracic program at University Hospital. The region serviced by the University of Texas Health Science Center at San Antonio medical school and the University Hospital has a high population of pediatric patients with cardiothoracic anomalies which require pediatric heart surgery. From this need the Allograft Resource Program was developed and has continued to grow rapidly. The Allograft Resource Program has continued to add services as demanded by the local community and now offers a vast array of services to include compliance assistance, recovery services, bereavement support, and location and delivery of difficult to find grafts for implantation.

Synonyms: Allograft Resources Tissue Bank, UTHSC Allograft Resources

Resource Type: biomaterial supply resource, tissue bank, material resource

Keywords: child, pediatric, tissue graft, implant

Related Condition: Cardiothoracic anomaly, Etc.
