SKY/M-FISH/CGH

RRID:SCR_007933

Type: Tool

Proper Citation

SKY/M-FISH/CGH (RRID:SCR_007933)

Resource Information

URL: <http://www.ncbi.nlm.nih.gov/sky/>

Proper Citation: SKY/M-FISH/CGH (RRID:SCR_007933)

Description: The SKY/M-FISH and CGH databases provide a public platform for investigators to share and compare their molecular cytogenetic data. The database is open to everyone and all users can view an individual investigator's public data or compare public cases from different investigators. Those wishing to contribute their own data must register and can choose to keep their data private for a period not to exceed two years. Spectral Karyotyping (SKY), Multiplex Fluorescence In Situ Hybridization (M-FISH) and Comparative Genomic Hybridization (CGH) are complementary fluorescent molecular cytogenetic techniques. SKY/M-FISH permits the simultaneous visualization of each human or mouse chromosome in a different color, facilitating the identification of chromosomal aberrations. CGH utilizes the hybridization of differentially labeled tumor and reference DNA to generate a map of DNA copy number changes in tumor genomes.

Synonyms: SKY/M-FISH/CGH

Resource Type: data or information resource, database

Resource Name: SKY/M-FISH/CGH

Resource ID: SCR_007933

Record Creation Time: 20220129T080244+0000

Record Last Update: 20260729T044215+0000

Ratings and Alerts

No rating or validation information has been found for SKY/M-FISH/CGH.

No alerts have been found for SKY/M-FISH/CGH.
