**Proper Citation:** National Institute on Aging, Database of Longitudinal Studies (RRID:SCR\_008259)

**Description:** THIS RESOURCE IS NO LONGER IN SERVICE, documented on August 11, 2015. A searchable database for epidemiologic research on aging changes across the lifespan. In 2003, the National Institute on Aging (NIA) established the Longitudinal Data on Aging (LDA) working group to assist with the development of research initiatives for identifying the physiologic and other types of factors across the lifespan, affecting onset and progression of disease with advancing age, as well as elucidation of protective factors contributing to exceptionally healthy aging. This database was developed based on input from the LDA working group which indicated that establishing a database of existing sources of longitudinal data on aging (e.g., ongoing longitudinal cohorts, longitudinal data sets, biospecimen repositories) would be a valuable resource for facilitating future research on aging changes across the lifespan. The longitudinal studies, data sets and repositories included in this database encompass a wide range of age groups (childhood to old age), studies in minority populations, as well as sources of longitudinal data existing in the United States and abroad. Our primary purpose for establishing this database is to provide a resource for potential applicants for grants to the NIA. No part of this database can be used for commercial purposes.

**Synonyms:** Database of Longitudinal Studies

**Resource Type:** data or information resource, database

**Keywords:** epidemiologic, healthy aging, human, lifespan, longitudinal, onset, progression of disease, protective factors

**Related Condition:** Aging

**Availability:** THIS RESOURCE IS NO LONGER IN SERVICE

**Resource Name:** National Institute on Aging, Database of Longitudinal Studies

**Resource ID:** SCR\_008259

**Alternate IDs:** nif-0000-22594

**Record Creation Time:** 20220129T080246+0000

**Record Last Update:** 20260815T182910+0000
