Description: The Australian Research Council (ARC) Centre of Excellence in Bioinformatics (ACB) is a multi-nodal interdisciplinary Center that uniquely brings together genomic and post-genomic bioinformatics, mathematics, statistics, systems analysis and experimental phenomics to produce a deep understanding of how information in the genome is transformed into structure and function in the mammalian cell. ACB is committed to: -Research excellence providing insights into genome-phenome biology. - An advanced education and training program that fosters excellence, exposes students from diverse disciplines to new perspectives in bioinformatics, and generates human capital. - Improved access to skills, tools and facilities at the interface among genomic and post-genomic biology, molecular cell biology, mathematics, statistics, and computing and information sciences. - Critical mass and a national focus for genome-phenome bioinformatics in Australia. Sponsors: This resource is supported by the following: Institute for Molecular Bioscience Newcastle Bioinformatics Initiative QosCosGrid University of Newcastle Centre for Bioinformatics, Biomarker Discovery and Information-based Medicine Keywords: Research, Bioinformatics, Multi-nodal, Interdisciplinary, Genomic, Mathematics, Statistics, System, Analysis, Experimental, Phenomics, Deep, Structure, Function, Mammalian, Cell, Biology, Education, Training, Program, Molecular, Cell biology, Mathematics, Statistics, Computation, Information, Science, Phenome,
