Description: Biological material management services provider including biospecimen storage, biobanking services, specimen collection kits, sample processing, DNA /RNA extraction and amplification, sample storage, distribution, and clinical trial support. They also offer transport and storage of active pharmaceutical ingredient(s) (API and bio-API), including cryogenic. They can assist with public health research, phase I/II/III/IV studies, prospective and retrospective studies, IND/NDA submissions to the FDA, and entry of biotherapeutics into the commercial marketplace.

Abbreviations: Fisher BioServices
