FiGS

RRID:SCR 012037

Type: Tool

Proper Citation

FiGS (RRID:SCR_012037)

Resource Information

URL: http://gexp.kaist.ac.kr/figs/

Proper Citation: FiGS (RRID:SCR_012037)

Description: A web-based workbench to conveniently compare the classification performances of many different filter-based gene selection procedures. In addition to the commonly used filter metric-classifier combinations, user can test various additive methodological options by specification of only up- or down-regulated genes to select, applying feature discretization and adding feature vectors to make a new feature. Throughout the comprehensive comparisons, user can identify the best performing gene selection procedure and subsequent classification performance measured by .632+ bootstrap error estimation for the given binary (two-class) microarray data.

Abbreviations: FiGS

Synonyms: FiGS - Filter-based Gene Selection workbench for microarray analysis, Filter-

based Gene Selection

Resource Type: analysis service resource, data analysis service, production service

resource, service resource

Defining Citation: PMID:20100357

Keywords: microarray, classification, parallel computing, disease, gene set

Funding:

Resource Name: FiGS

Resource ID: SCR_012037

Alternate IDs: OMICS_02293

Record Creation Time: 20220129T080308+0000

Record Last Update: 20250430T055801+0000

Ratings and Alerts

No rating or validation information has been found for FiGS.

No alerts have been found for FiGS.
