### Resource Information

**URL:** <http://www.comstat.dk/>

**Proper Citation:** Comstat (RRID:SCR\_014566)

**Description:** A software that is used to analyze image stacks of biofilms that were recorded by confocal microscopes. While this program does not have any statistical calculation methods, it can extract a number of quantitative parameters from the images. This software was initially developed by Arne Heydorn and Bjarne Ersboll as a MatLab script until it was expanded into an independent software in 2008.

**Resource Type:** data processing software, software application, image analysis software, software resource

**Keywords:** image stack, biofilms, confocal microscope, image analysis, biofilm, quantitative parameter

**Availability:** Open Source with sign-up

**Resource Name:** Comstat

**Resource ID:** SCR\_014566

**License:** Information on main website

**License URLs:** <http://www.comstat.dk/>

**Record Creation Time:** 20220129T080321+0000

**Record Last Update:** 20260806T054609+0000

---

### Ratings and Alerts

No rating or validation information has been found for Comstat.

No alerts have been found for Comstat.
