Proper Citation: Zeiss: LEO 1525 Field Emission Scanning Electron Microscope (RRID:SCR_018039)

Description: Field emission scanning electron microscope that performs ultra high resolution imaging and analysis. Designed for requirements of nano-analysis, chamber of LEO 1525 is capable of accommodating both EDS and full-focusing Wavelength-dispersive X-ray spectroscopy WDS spectrometers as well as rage of other accessories. Coincident and short working distances allow signals from these detectors to be acquired simultaneously.

Synonyms: LEO 1525

Resource Type: instrument resource

Keywords: ABRF, Field Emission Scanning Electron Microscope, instrument, equipment
