Proper Citation: QuASIMoDOH (RRID:SCR_018708)

Description: Software tool to describe spatial patterns in degrees of inhomogeneity and to incorporate intensity based correction to analyze images with wide range of resolutions. Can be used to assess protein and lipid patterns, quantifying distribution changes and spatial reorganization at cell surface.

Abbreviations: QuASIMoDOH

Synonyms: Quantitative Analysis of Spatial distributions in Images using Mosaic segmentation and Dual parameter Optimization in Histograms

Resource Type: data processing software, image analysis software, software application, software resource
