Proper Citation: mgatk (RRID:SCR_021159)

Description: Software python-based command line interface for processing .bam files with mitochondrial reads and generating high-quality heteroplasmy estimation from sequencing data. This package places a special emphasis on mitochondrial genotypes generated from single-cell genomics data, primarily mtscATAC-seq, but is generally applicable across other assays.

Synonyms: mitochondrial genome analysis toolkit

Resource Type: software toolkit, software application, software resource, data processing software

Defining Citation: [DOI:10.1038/s41587-020-0645-6](https://doi.org/10.1038/s41587-020-0645-6)

Keywords: processing .bam files, mitochondrial reads, heteroplasmy estimation, sequencing data, mitochondrial genotypes, mtscATAC-seq

Funding: NCI F31 CA232670;
NCI R01 CA208756;
NCI P01 CA206978;
