Proper Citation: Social LEAP (RRID:SCR_021382)

Description: Method for pose estimation that uses deep neural networks.Open source software tool as deep learning based framework for estimating positions of animal body parts.Supports multi animal pose estimation and tracking, and includes advanced labeling or training.SLEAP is next generation of LEAP and allows for tracking multiple animals.

Abbreviations: SLEAP

Synonyms: Social LEAP Estimates Animal Pose

Resource Type: software resource

Defining Citation: DOI:10.1101/2020.08.31.276246

Keywords: Estimating positions, animal body parts, multi animal pose estimation, multi animal pose tracking, Princeton University, OpenBehavior
