Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented on February 8th, 2024. Facility offers sequencing services on three platforms, gold standard Sanger sequencing on ABI capillary sequencers, next generation sequencing (NGS) on Ion Torrent PGM and S5 and, Illumina MiSeq along with experimental design and data analysis. NGS service includes library preparation for multiple applications including targeted sequencing, RNA-Seq and Exome-Seq. Capillary sequencers also enable microsatellite genotyping and fragment analysis for VNTR, SNaPshot and Human Cell Line Authentication. Molecular biological services include PCR, cloning, subcloning, mutagenesis, construct preparation and, plasmid DNA preps at different scales.
