Description: Substance Abuse and Mental Health Services portal provides information about 2023 National Survey on Drug Use and Health. This report highlights 2023 estimates of substance use, mental health, and treatment in the United States. These national indicators are measured among people aged 12 or older in the civilian, noninstitutionalized population. Estimates are presented by age group and by race/ethnicity for selected measures. Along with the full report, which includes both figures and text descriptions, set of slides is available which includes just the figures from the report.
