Proper Citation: Harvard University School of Medicine BIDMC HIV-1 Neutralizing Antibody Core Facility (RRID:SCR_026484)

Description: Core provides in vitro HIV-1 neutralizing antibody assay services. Serves as resource for assessing breadth and potency of HIV-1 neutralizing antibodies, and for characterizing neutralization phenotype of HIV-1 isolates. Investigators send monoclonal antibodies or serum samples from vaccinated or HIV-1-infected individuals to the core for in vitro testing using the validated TZM.bl neutralizing antibody assay. The core also has the capability to phenotype primary HIV-1 isolates for sensitivity to broadly neutralizing antibodies. GCLP-compliant, In vitro testing of monoclonal antibodies or seurm samples, Validated TZM.bl neutralizing antibody assay, Phenotoyping of primary HIV-1 isolates.

Synonyms:, Beth Israel Deaconess Medical Center Neutralizing Antibody Core, BIDMC HIV-1 Neutralizing Antibody Core

Resource Type: access service resource, service resource, core facility
