Proper Citation: Bruker: BioSpec 70/30 USR MRI system (RRID:SCR_027282)

Description: High-field, preclinical imaging system primarily used for research on small animals like mice and rats. It enables researchers to conduct detailed anatomical and functional studies, including morphological imaging, functional MRI (fMRI), diffusion tensor imaging (DTI), and MR spectroscopy (MRS). The system's high field strength allows for high-resolution imaging, enabling researchers to visualize intricate anatomical details and subtle changes in tissue and organ function.
