Description: A database of scientific names in zoology. ZooBank is an online, open-access, community-generated registry for zoological nomenclature. It serves as a service to taxonomists, biologists, and the global diversity informatics community. It is the Official Register of the International Commission on Zoological Nomenclature (ICZN).

Resource Type: controlled vocabulary, data or information resource, database

Defining Citation: [PMID:22977348](#)

Keywords: zoo, bank, taxonomy, biology, global diversity, informatics, registry, zoology, iczn, official register of the international commission on zoological nomenclature, FASEB list

Funding: NSF DBI-1062441;
