NOISeq

RRID:SCR_003002
Type: Tool

Proper Citation

NOISeq (RRID:SCR_003002)

Resource Information

URL: http://bioinfo.cipf.es/noiseq/doku.php?id=start

Proper Citation: NOISeq (RRID:SCR_003002)

Description: Software used for the identification of differentially expressed genes from count data or previously normalized count data. It empirically models the noise distribution of count changes by contrasting fold-change differences (M) and absolute expression differences (D) for all the features in samples within the same condition. This reference distribution is then used to assess whether the M-D values computed between two conditions for a given gene is likely to be part of the noise or represent a true differential expression.

Resource Type: data processing software, data analysis software, sequence analysis software, software resource, software application

Defining Citation: DOI:10.1101/gr.124321.111

Keywords: differentially expressed genes, gene identification

Funding:

Availability: Available for download, Acknowledgement requested

Resource Name: NOISeq

Resource ID: SCR_003002

Alternate IDs: OMICS_01311

Record Creation Time: 20220129T080216+0000

Record Last Update: 20250426T055606+0000

Ratings and Alerts

No rating or validation information has been found for NOISeq.

No alerts have been found for NOISeq.
