DnaSP

RRID:SCR_003067

Type: Tool

Proper Citation

DnaSP (RRID:SCR_003067)

Resource Information

URL: <http://www.ub.edu/dnasp/>

Proper Citation: DnaSP (RRID:SCR_003067)

Description: A software package for the analysis of nucleotide polymorphism from aligned DNA sequence data. DnaSP can estimate several measures of DNA sequence variation within and between populations (in noncoding, synonymous or nonsynonymous sites, or in various sorts of codon positions), as well as linkage disequilibrium, recombination, gene flow and gene conversion parameters. DnaSP can also carry out several tests of neutrality: Hudson, Kreitman and Aguad (1987), Tajima (1989), McDonald and Kreitman (1991), Fu and Li (1993), and Fu (1997) tests. Additionally, DnaSP can estimate the confidence intervals of some test-statistics by the coalescent. The results of the analyses are displayed on tabular and graphic form.

Abbreviations: DnaSP

Synonyms: DNA Sequence Polymorphism

Resource Type: data analysis software, data processing software, software application, software resource

Defining Citation: [PMID:19346325](#), [PMID:19378153](#), [PMID:14668244](#), [PMID:10089204](#), [PMID:9183537](#), [PMID:8808578](#)

Keywords: genetics, dna, population genetics, sequence, polymorphism, nucleotide polymorphism, dna sequence, population, noncoding, synonymous, nonsynonymous

Funding: Spanish Direccion General de Investigacion Cientifica y Technica PB91-0245; Spanish Direccion General de Investigacion Cientifica y Technica PB94-0923; Spanish Direccion General de Investigacion Cientifica y Technica PB97-0918; Spanish Direccion General de Investigacion Cientifica y Technica TXT98-1802; Spanish Direccion General de Investigacion Cientifica y Technica BMC2001-2906; Spanish Direccion General de Investigacion Cientifica y Technica BFU2004-02253;
