Proper Citation: Informant Questionnaire on Cognitive Decline in the Elderly (RRID:SCR_003680)

Description: Assessment questionnaire used as a screening test for dementia that is filled out by a relative or other supporter who knows the patient for a minimum of 10 years to determine whether that person has declined in cognitive functioning. It lists 26 everyday situations where a person has to use their memory or intelligence. The questions on the test compare the patient''s state of mind to 10 years ago using the scale of: Much Improved A Bit Improved Not Much Change A Bit Change A Bit Worse and Much Worse. If the person is found to have significant cognitive decline, then this needs to be followed up with a medical examination to determine whether dementia is present. Scoring: * 0-3 No Cognitive Impairment * >3 Cognitive Impairment

Abbreviations: IQCODE

Synonyms: Informant Questionnaire on Cognitive Decline in the Elderly (IQCODE)

Resource Type: assessment test provider, material resource

Keywords: late adult human, cognitive functioning, questionnaire, cognitive

Related Condition: Cognitive Impairment, Dementia
