Proper Citation: CHB-MIT Scalp EEG Database (RRID:SCR_004264)

Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented on November 22, 2022. Data set collected at the Children's Hospital Boston, of EEG recordings from pediatric subjects with intractable seizures. Subjects were monitored for up to several days following withdrawal of anti-seizure medication in order to characterize their seizures and assess their candidacy for surgical intervention. All signals were sampled at 256 samples per second with 16-bit resolution. Most files contain 23 EEG signals (24 or 26 in a few cases).

Abbreviations: CHB-MIT Scalp EEG Database

Resource Type: data or information resource, data set

Keywords: eeg, pediatric, young human

Related Condition: Seizure

Availability: THIS RESOURCE IS NO LONGER IN SERVICE

Resource Name: CHB-MIT Scalp EEG Database

Resource ID: SCR_004264

Alternate IDs: nlx_28050

Record Creation Time: 20220129T080223+0000

Record Last Update: 20260904T000614+0000

Ratings and Alerts

No rating or validation information has been found for CHB-MIT Scalp EEG Database.

No alerts have been found for CHB-MIT Scalp EEG Database.
