Proper Citation: KI Biobank - Sodertaljevartan (RRID:SCR_006047)

Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented on May 3rd, 2023. Secondary prevention of ischemic heart disease in primary care, a randomized controlled intervention study. The study aims to elucidate if an early, active, group-oriented intervention at the primary care level can decrease the probability of developing a new cardiovascular event within three years, when compared to primary care according to standard protocols. The study also aims at analyzing how the intervention affects parameters as physical activity, eating habits, quality of life, blood pressure, waist measure, and smoking habits. Furthermore, changes in biochemical markers related to glucose- and lipid metabolism, stress related hormone production and sub clinic inflammatory activity as well as the presence of DNA polymorphism in the IL-6- and adiponutrin (ADPN) genes, will be investigated. Types of samples * EDTA whole blood * DNA Number of sample donors: 102 (sample collection completed)

Abbreviations: Sodertaljevartan

Resource Type: biomaterial supply resource, material resource

Keywords: primary care, intervention, heart, cardiac disease, physical activity, eating habit, quality of life, blood pressure, waist measure, smoking habit, biochemical marker, biomarker, glucose metabolism, lipid metabolism, stress related hormone, sub clinic inflammatory activity, polymorphism, il-6-gene, adiponutrin gene, gene

Related Condition: Ischemic heart disease

Availability: THIS RESOURCE IS NO LONGER IN SERVICE

Resource Name: KI Biobank - Sodertaljevartan

Resource ID: SCR_006047

Alternate IDs: nlx_151445

Record Creation Time: 20220129T080234+0000

Record Last Update: 20260829T183047+0000

Ratings and Alerts

No rating or validation information has been found for KI Biobank - Sodertaljhjartan.

No alerts have been found for KI Biobank - Sodertaljhjartan.
