Proper Citation: Brain Injury Association of America (RRID:SCR_006639)

Description: The country's oldest and largest nationwide brain injury advocacy organization. We are dedicated to increasing access to quality health care and raising awareness and understanding of brain injury through advocacy, education and research. With a nationwide network of more than 40 chartered state affiliates and hundreds of local chapters and support groups, we provide help, hope and healing for individuals who live with brain injury, their families and the professionals who serve them. Brain injury is not an event or an outcome. It is the start of a misdiagnosed, misunderstood, under-funded neurological disease. Individuals who sustain brain injuries must have timely access to expert trauma care, specialized rehabilitation, lifelong disease management and individualized services and supports in order to live healthy, independent and satisfying lives.
