**Proper Citation:** Diabetes in America (RRID:SCR\_006754)

**Description:** A compilation and assessment of epidemiologic, public health, and clinical data on diabetes and its complications in the United States. Published by the National Diabetes Data Group of the National Institute of Diabetes and Digestive and Kidney Diseases, the book contains 36 chapters organized in five areas: \* the descriptive epidemiology of diabetes in the United States based on national surveys and community-based studies, including prevalence, incidence, sociodemographic and metabolic characteristics, risk factors for developing diabetes, and mortality \* the myriad complications that affect patients with diabetes \* characteristics of therapy and medical care for diabetes \* economic aspects, including health insurance and health care costs \* diabetes in special populations, including African Americans, Hispanics, Asian and Pacific Islanders, Native Americans, and pregnant women. Diabetes in America, 2nd Edition, has been designed to serve as a reliable scientific resource for assessing the scope and impact of diabetes and its complications, determining health policy and priorities in diabetes, and identifying areas of need in research. The intended audience includes health policy makers at the local and Federal levels who need a sound quantitative base of knowledge to use in decision making; clinicians who need to know the probability that their patients will develop diabetes and the prognosis of the disease for complications and premature mortality; persons with diabetes and their families who need sound information on which to make decisions about their life with diabetes; and the research community which needs to identify areas where important scientific knowledge is lacking.

**Abbreviations:** Diabetes in America

**Synonyms:** Diabetes in America 2nd Edition

**Resource Type:** resource, data or information resource, narrative resource, book

**Keywords:** epidemiology, prevalence, incidence, sociodemographic, metabolic, risk factor, mortality, complication, therapy, medical care, economic, health insurance, health care cost, african american, hispanic, asian, pacific islander, native american, pregnant, clinical, pdf, medical care

**Related Condition:** Diabetes
